Steve and/or Wes:

Below is permission from Jemez Pueblo through NMED to fly an ASPECT survey over Jemez Pueblo. Waiting on similar permission from Cochiti Pueblo. I asked for this in writing to cover us documentation wise. I don't know if you guys need to forward to Janine Hale or David Gray or if you want to put in bullets since Al got asked about this at the RTOC. This will be part of our last overflight. Also, at the 1500 Ops briefing I publicly stated that we plan on starting our demob on 07/05 unless something dramatically changed. No push back from State EOC. Just got a conference call with LANL, DOE Senior Energy Official, Dave Bowman, and NMED Radiation Bureau chief, Michael Ortiz discussing a coordinated federal exit strategy. DOE proposed to shut down their RAP samplers on 07/05, I told them that was consistent with our exit strategy, NMED had no issues with the dates. So at this point in time it looks like we have an exit strategy.

Warren

Mr Ortiz:

Thank you for your call.

I have spoken with 2nd Lt Governor William Waquie and he has given permission for your radiation survey flight over Jemez lands tomorrow (7/2) morning.

We appreciate your assistance in monitoring for contaminants and will look forward to reports on the results.

Please do not hesitate to contact me by cell phone if I can provide any additional assistance.

Thank you,

Suzanne Gifford
